LABORATORY MANAGER

TRANSFERT and STORAGE CONDITIONS OF ALUMINIUM STRIPS AND SHEETS BY CUSTOMER
Strips (sheets) should be transported by covered, dry and clean means of transport protecting them from humidity and action of active chemicals. Protection of roll edges requires special attention.
Strips (sheets) should be stored in covered, dry and clean rooms protecting them from humidity and action of active chemicals. Protection of roll edges requires special attention.
The storage temperature should be stable. Changes of the temperature in such cases that air moisture is condensed on the strip surface, in consequence of capillary activity, between rolls, promotes scale and surface corrosion.
Disregard of above mentioned transport and storage conditions shall be regarded as responsibility for material quality.

CERTIFIED INSPECTION REPORT

Alcoa Inc.

DAVENPORT WORKS 4879 State Street Bettendorf, IA 52722

Ship From: RIVERDALE, IA.

We hereby certify that the material covered by this certificate has been inspected with, and has been found to meet the applicable requirements described therein, including any specifications covering a part of the description and that samples representative of the material meet the composition limits and that the mechanical properties shown on the face of this report. This test report shall not be reproduced except in full without the written approval of the Quality Department. No alteration, addition or other change is authorized to be made to this certificate. The recording of false, fictitious, or otherwise fraudulent statements or omissions on this certificate by any recipient may be punished as a felony under applicable law.
